Vinusha Srithar – Resume

Vinusha Srithar | SEO Executive

Arakkonam, Tamil Nadu, India | +91 80724 06013 | smvinu69@gmail.com
LinkedIn: linkedin.com/in/vinushasrithar | Portfolio: bluepill02.github.io

Professional Summary

SEO and web-growth practitioner who builds, deploys, and optimizes websites end to end. Hands-on with technical SEO, on-page optimization, keyword research, and answer engine optimization (AEO), using Google Search Console, GA4, Screaming Frog, Ahrefs, and Semrush. Built and grew three web projects, sustaining 350–500 monthly visitors for three months on a WordPress site, and diagnosed traffic and conversion drop-offs through testing. Seeking an SEO Executive role to drive organic growth.

Technical Skills

- **SEO:** Technical SEO, On-Page SEO, Keyword Research, Site Audits, Answer Engine Optimization (AEO), Content Optimization, Site Speed Optimization, Caching
- **SEO and Analytics Tools:** Google Search Console, Google Analytics 4 (GA4), Screaming Frog, Ahrefs, Semrush
- **Web Development:** WordPress (custom theme, SEO and caching plugins), HTML, CSS, JavaScript, Python, Vercel, Fourthwall, Google Solar API
- **Dev Tools:** Git, GitHub, GitHub Copilot, VS Code, Docker (intermediate), Linux command line, Ollama (local AI deployment)
- **Digital Marketing:** Social Media Management and Scheduling, Paid Social Campaigns, A/B Testing, Content Strategy, Canva, Adobe Express
- **AI-Assisted Workflows:** Prompt-driven development, AI content and video production

Projects

CostSmart Five – Personal Finance Hub | cost-smart-five.vercel.app | Vercel, Google Solar API, GA4, Search Console

- Built and deployed a personal finance website with a solar savings estimator powered by the Google Solar API. Scored 95 (performance), 100 (SEO), and 96 (best practices) on Lighthouse.
- Rewrote the landing page around high-search-volume keywords, growing direct traffic by 50–100 monthly visitors; Search Console impressions reached 3K+ over six months.
- Benchmarked against high-authority banking sites and identified consistent, in-depth content publishing as the key ranking and retention gap.
- Tested a freemium model, display ads, and an ad-blocker banner; tracked the traffic and revenue impact of each in analytics.

Vellichor – Fantasy Romance Blog and News Site | WordPress, custom theme, SEO and caching plugins

- Built a WordPress site with an AI-assisted custom theme; sustained 350–500 monthly visitors for three months.
- Added social auto-posting plugins, which lifted traffic to roughly 70% direct and 30% social.
- Configured SEO and caching plugins to improve page speed and user experience.
- Site taken offline due to hosting costs.

Segfault Supply Shop – Developer-Culture Merchandise Store | Fourthwall, social media, AI video

- Launched an apparel and accessories store for developers and tested multiple social media content strategies.
- Measured results by format: AI hyperrealistic videos averaged about 150 views, while hyperframe videos fell to single digits, so I reverted to the stronger format.
- Applied a test, measure, and iterate approach to content and audience growth.

Education

Government Medical College, Omandurar Estate, Chennai | MBBS | 2 years completed

Self-directed IT learning since: web development, backend development (in progress), Linux, and SEO.

The Velammal International School | CBSE Class XII, Science | 2020 | 97%
